About Me

Dedicated and driven cybersecurity professional with a strong focus on offensive security and penetration testing. Specializing in identifying and exploiting web application vulnerabilities, I am continually honing my skills to stay ahead in the evolving threat landscape. Passionate about protecting digital assets and ensuring security resilience through comprehensive proactive testing and innovative solutions, I strive to deliver effective results.

Education

Cambodia Academy of Digital Technology

Bachelor of Telecommunication and Networking

Specialize in Cyber Security

Junior Student (2023 - Current)

Tux Global Institute

Upskilling in Cyber Security

2024 - Current

Key Activities and Achievements

KHoding Hero 2024 Coordinator August 2024

Managed volunteers and demonstrated adaptability by overcoming logistical challenges to deliver impactful digital education to rural students, ensuring effective communication and resource management throughout the program.

Top 8 finalist - Cyber Elite Game 2024 August 2024 Competitor

Showcased creativity and resourcefulness in solving complex challenges under pressure, highlighting my expertise in security domains and commitment to innovative problem-solving, enhancing my offensive security and penetration testing skills.

Top 8 finalist - CTF For Cambodia and Lao July 2024 Competitor

Demonstrated creativity and resourcefulness in solving complex challenges under pressure, showcasing my knowledge in security domains and enhancing my skills in offensive security and penetration testing.

Innovation Festival - Makerthon May 2024 4th Place - IoT Smart Irrigation

Developed an IoT-based smart irrigation system in a one-day competition, showcasing innovation in automation and sustainable technology.

KHoding Hero 2023 Volunteer August 2023

Led educational sessions on computer fundamentals and programming for rural students, overcoming challenges and demonstrating adaptability and commitment to impactful digital education.
